SKILLS

Programming	Python, C, Java, MATLAB
Databases	SQL, Database Design, SQLite
Web Technologies	HTML, CSS, JavaScript
Tools	Git, GitHub, LaTeX
Soft Skills	Problem-solving, Teamwork, Time Management, Attention to Detail
Languages	English (Proficiency), German (B1), Greek (Native)

SUMMARY

Undergraduate Electrical and Computer Engineering student with hands-on experience in full-stack development and machine learning. Built a real-world tennis club management system and AI models (CNN, clustering) using Python, SQL, and Streamlit. Interested in software engineering and data-driven applications.

TECHNICAL EXPERIENCE

Tennis Club Management System (Maroussi Tennis Club)

Full-stack Application

Greece

Designed and developed a custom application for managing a tennis academy including:

- Built full-stack application used for real-world academy operations
- Member management, subscriptions, and payment tracking
- Court scheduling and attendance monitoring
- Financial tracking (income, payments, pending fees)
- Built using Python, SQLite and Streamlit

Web Scraping & Data Extraction Tools

Python Projects

GitHub

- Developed web scraping scripts for automated data collection
- Processed and structured data using Python
- Focus on real-world datasets and automation tasks

AI Applications (Machine Learning)

Python / Neural Networks

GitHub

- **Handwritten Digit Recognizer (Repo)**
 - Built Convolutional Neural Network (CNN) trained on MNIST dataset
 - Implemented data preprocessing, training and evaluation pipeline
 - Achieved high accuracy in handwritten digit classification
 - Achieved >95% accuracy on MNIST dataset
- **PhotoGroupAI (Repo)**
 - Developed image clustering system using machine learning algorithms
 - Implemented feature extraction and unsupervised clustering techniques
 - Built GUI for user interaction and dataset configuration

Food Ordering App (eFood-like)

Software Project

GitHub

- Developed a food ordering application inspired by eFood
- Focus on UI structure and application logic
- Simulated real-world ordering workflows

Next Generation Optical Access Networks

Research Project

03/2021 — 05/2021
ResearchGate

Conducted a study in telecommunications and wrote a scientific article on Next Generation Optical Access Networks.

EDUCATION

Undergraduate Student in Electrical and Computer Engineering , <i>University of Patras</i>	10/2020
<i>High School Diploma</i> 19.6/20	12/06/2020

ACTIVITIES

Teaching physics in high school students including preparation for the annual university entrance final exams	10/2020 — 02/2022
Representative in European Parliament (Euroscola)	25/01/2019 — 31/01/2019
Volunteer Action in the Authentic Marathon	2018
Volunteer Action in the Authentic Marathon	2017
